IAHC (MTC) HEALTH REFRESHER COURSES
FOR 1991

By the end of 1990 IAHC decided to carry out Refresher Courses for its trained MLHWS (totally some 50 students) who have been working in IAHC Cross-Border Health Projects.

The main purpose of these courses is to upgrade the Health Workers' knowledge and ability in practice, mainly in the fields of laboratory (diagnosis of TB and Malaria), better usage of microscopes and blood transfusion.

The schedule is that in each quarter of the year (1991) the Medical Training Course is training about 13 students selected from the four provinces.

The condition for the Refresher Courses is that the MLHW should have worked for at least one year in his clinic.

Each course has its title A,B,C, and D respectively.

On the next pages, we have presented the lists of the MLHWS who are already trained or will be trained in the course of the year 1991.

Thank you for your attention.

- COURSE (A) GRADUATED STUDENTS
- STARTED : 6th Jan, 1991
- COMPLETED : 4th March, 1991.

NAME	FATHER NAME	PROVINCE	DISTRICT	VILLAGE

IAHC

Health Workers & Health Facilities in Afghanistan.

Updated 9 September 1991

Compiled by Moh. Saeed

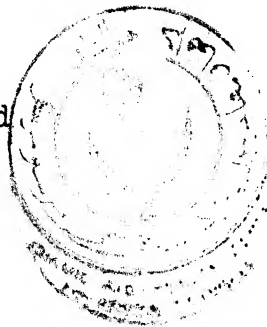

I N T R O D U C T I O N

Islamic Aid Health Centre (IAHC) as an Afghan NGO has been working inside Afghanistan since 1984. It has concentrated its medical as well as other programmes in the four south western provinces; Ghazni, Kandahar, Helmand and Oruzgan.

As assessment is necessary for all the projects, IAHC decided to update its Health Workers database. Our last database has been issued on the 28th May 1990.

Getting experience, this time we would like to add some information or remarks on each clinic IAHC runs in the four provinces. Hopefully it is of use to those who are interested in.

Mohammad Saeed
Secretary
IAHC.

NOTE :

IAHC Medical Projects as well as others are being supervised and administered by local salaried shuras consist of Project Supervisor, local respected old people, other influentials and mujahideen representative.

The shura staff is working between IAHC Projects and local community and prepare a way for better service, especially to rehabilitate the community as soon as possible.

GHAZNI PROVINCE
